(1) REPORT WRITING - FORM FD-305 - FBI FORM BOOK -- Enclosed are three copies of Form FD-305, one of which should be placed in your FBI Form Book.

This form is designed for use in Security Index cases only. It should be appropriately numbered at bottom of page and will constitute the last page of the cover memoranda to reports submitted in Security Index cases. The form will be printed on white manifold paper only in order to save printing and keeping a stock of bond and yellow forms. The white manifold will serve as the last page of all copies of the cover memoranda, including the yellow file copy.

A supply of Form FD-305 is being forwarded under separate cover. Future requisitions of this form should be limited to your needs not in excess of three months.

Very truly yours,

John Edgar Hoover

SUBJECT: STREAMLINING PROCEDURES
SECURITY INDEX CASES

In connection with reports in Security Index (SI) cases, the field is required to set forth certain specific items of an administrative nature in cover memoranda accompanying the reports. For example, it must make a statement regarding the classification of the report and that the data appearing on the SI card is current or, if not, that appropriate changes have been submitted to the Bureau. The various items upon which the field must comment constitute one page of the cover memorandum.

At the Internal Security - Espionage Conference of 11/14-15/57, it was recommended that a form letter be prepared incorporating the various items, thus enabling the dictating Agent to check the pertinent items and thereby eliminate considerable dictation and stenographic work and it would assure that the dictating Agent has considered each of the items on which he must comment specifically when submitting reports in SI cases.

Such a form has been prepared (copy attached) and has been given the tentative number of FD-305.

The Domestic Intelligence Division feels that the adoption of this form would be of definite value to the field. It would be utilized by the field in connection with the submission annually of 15 to 20,000 reports in SI cases. It would undoubtedly result in some savings in dictation and stenographic time and would insure that the preparing Agent has given appropriate consideration to each of the items appearing thereon.

It is noted that in every SI case, eight of the ten items listed must be commented on specifically. In many of the cases, nine of the ten items listed are pertinent.

This form should be printed on white manifold paper only in order to save printing and keeping a stock of bond and yellow forms. The white manifold will serve as the last page of all copies of the cover memoranda, including the yellow file copy.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONSIndex Card

Administrative reports from the field are analyzed monthly to determine the status of delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Recent reports indicate a trend toward increase in delinquency in these matters. Over-all delinquency in the field in the security classifications has increased from 8.5% for the month of October, 1957, to 11.1% for November, and 13.1% for December, 1957. Similarly, the number of offices having security delinquency of 15% or more has increased from an average of 6.5 offices during the six months prior to November, 1957, to eight offices in November, and 13 offices in December, 1957.

Several of the Special Agents in Charge who have been at the Seat of Government recently have advised me in discussions with them that they have found it necessary to draw men off of security work in their respective offices for utilization on other matters, primarily in the criminal field, such as the Top Hoodlum Program. Particularly has it been necessary to transfer to this work men who have acquired through experience in security work exceptional ability in the gathering of intelligence information and in the use of special and unusual investigative techniques. Thus, these men have been lost to the security squads of the various offices.

As noted in my memorandum to you, 1/3/58, captioned "Domestic Intelligence Division," we conducted a survey in December, 1957, throughout the Division of our programs and personnel with a view to streamlining wherever possible and to the elimination of any possible programs not absolutely essential to the fulfillment of our responsibilities in the internal security field. The programs and procedures being carried out are, as set out in my memorandum of 1/3/58, believed to be sound and necessary at the present time. We intend, therefore, to continue to insist to the field that all of our programs in the security field be kept current and up to date. We intend also to continue following the status of delinquency in security investigations and will analyze the administrative reports for the month of January, 1958, when received and then report again as to what the trend may be in security delinquency.

Office Memorandum • UNITED STATES GOVERNMENT

FROM :

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONSIndex (cont.)SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100, and 105. Status of these cases as of December 31, 1957 is set forth herein.

In December, there was an increase in pending active matters in the entire field in the security classifications from 15,817 to 15,926. Delinquent matters increased from 1,762 to 2,088. The percentage of delinquent matters increased from 11.1% to 13.1%.

Letters are being sent to the offices indicated by asterisks on pages four and five herein, commenting upon their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the January, 1958, administrative reports.

FROM :SUBJECT: *0* SECURITY INVESTIGATIONS OF INDIVIDUALS *awh*

All instructions dealing with security investigations of individual members of the Nation of Islam are contained in SAC letters. At the time the initial instructions were issued dealing with such investigations in March, 1953, there were only nine temples located in eight field divisions. This organization has continued to spread and temples are now located in 27 field divisions and we presently have the names of 302 individuals included in the Security Index based on their activity in this organization.

Inasmuch as this organization has spread greatly and continues to spread, it is felt that pertinent instructions dealing with the investigation of individual members thereof should now be incorporated into the Manual of Instructions.

ACTION:

If you approve, there are attached proposed revisions to Section 87-D of the Manual of Instructions dealing with the investigation of individual members of the Nation of Islam.

PROPOSED CHANGES IN
MANUAL OF INSTRUCTIONSSection 67-D

Add the following as the second and third paragraphs of item f, page 23:

Falling within the above category are members of the Nation of Islam. When it is known or becomes known that this organization is active in the field office territory, a security-type investigation of all individuals who are reported to be (1) functionaries or leaders of the Nation of Islam, (2) members of the military section of the Nation of Islam known as the "Fruit of Islam," and (3) active participants carrying out fanatical and disloyal aims and purposes of the organization should be initiated. Investigation should not be initiated based on mere membership alone.

During the course of security investigations of individuals affiliated with the Nation of Islam, be alert for any information indicating a possible violation of the Selective Service Act of 1948.

Following item IV, page 42a, add the following as item V:

Proposed Changes in Manual of Instructions

Following item (c), page 46, add the following as item (d):

~~The Department has advised that, from its study of available evidence concerning the Nation of Islam, it appears that the anti-white and anti-United States Government teachings of this organization could constitute a potentially dangerous instrumentality in the event of a national emergency, and that statements and activities on the part of individual members of the Nation of Islam indicating anarchist and revolutionary beliefs should be considered in making a judgment as to whether or not such individual members should be included in the Security Index. In view of the above, particular attention should be given during the course of investigations of individual members of this organization to the developing and reporting of such statements on the part of these individuals, including the reporting of violent and revolutionary statements made by other members in their presence. Such statements should be reported in detail.~~

The present item (d) on page 46 should be changed to (e).

SUBJECT: DELINQUENCY IN ~~SECURITY~~ INVESTIGATIONS - GeneralSYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100, and 105. Status of these cases as of January 31, 1958, is set forth herein.

In January, there was a decrease in pending active matters in the entire field in the security classifications from 15,926 to 15,447. Delinquent matters decreased from 2,088 to 1,453. The percentage of delinquent matters decreased from 13.1% to 9.5%.

Letters are being sent to the offices indicated by asterisks on page five herein, commenting upon their delinquency and pointing out the necessity of bringing their security cases to a current status. Letters are being directed to three offices as compared to thirteen offices last month.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the February, 1958, administrative reports.

RECOMMENDATION: A current documentation of each Security Index subject would be maintained as the top serial of every Security Index file with full substantiation as to the original source of information. This documentation would be reviewed upon submission of the yearly report, or, if advisable, each six months at the time of residence and employment verifications to insure the documentation is current and correct.

Documentation of individuals not on the Security Index would be entered in their individual files in a similar manner only as the occasion demanded their preparation.

(Continued Page 1A)

Current practice or type (include a brief citation as well as facts): Manual requires an authoritative statement reflecting the subversive connection of the individual being documented (III-87-6). Suggestion concerns retention and availability of documentation when once prepared.

Advantages of suggestion: Procedure would eliminate the necessity of redocumenting these individuals through extensive file reviews each time they appeared in organizational reports or reports on other individuals. Procedure would be more accurate, uniform and eliminate chance of error in documentation.

Disadvantages of suggestion: Would require time to prepare the Security Index subjects' documentations through file reviews at the indicated time.

Annual Savings (SAGW basis for estimate): Unable to estimate.
Let. L Emp. 3-10-58-enc

The use by the United States of my suggestion shall not form the basis upon the United States: ☒ Yes ☐ No ☐ Other

Signature and Title of Suggester: [Signature] Special Agent

Remarks: This suggestion has merit and is worthy of further consideration by the Bureau. Once the documentations were prepared and placed as top serial in file, considerable agent time would be saved in reviewing file for most current documentations.

SUGGESTION CONTINUED:

Preparation and review dates of documentations could be noted in such a manner that it would be necessary only to review serials subsequent to that date to insure that a current and accurate documentation was being used.

SUBJECT: SUGGESTED CHANGE IN
SECURITY INDEX CARDS
ON LABOR UNION INFILTRATION
SECURITY MATTER

By memo 2-25-58 the New York Office recommended that a determination of labor union affiliation, if any, be required in all security investigations of individuals and that such affiliation be listed on Security Index (SI) cards. New York stated that this would eliminate the need for an annual survey to determine if all possible Labor Management Relations Act (LMRA) cases have been opened; would assist in verifying residence and employment through union and management sources; would cause more frequent contact with sources in plants and unions; would provide a basis for disseminating to files on communist infiltrated unions the identities of security subjects who are members and thus assist in the identification of unknown subjects; and would provide a means of determining the number of security subjects in a given union at any time.))

Page 33, Section 47D, Manual of Instructions, provides that in the security investigation on an individual his importance to the subversive organization must be determined, and specifically points out that a subject's importance may be due to his position in a labor organization. If these instructions are followed, our investigation will determine if an individual holds any office or position of importance in a labor union. Our investigations regarding the communist infiltration of labor unions are concerned primarily with the positions occupied by subversives in a union and the influence they are able to exert on the union's programs and activities. Mere union affiliation where the subversive is taking no part in union activities and holds no position in the union is not of primary importance.

Memorandum to :
RE: SUGGESTED CHANGES
IN SECURITY INDEX CARDS

The recording of labor union affiliation on the SI cards would be undesirable. These cards were designed for a specific purpose, to provide necessary data for locating and arresting subversives in time of emergency, and should be confined to that purpose without the addition of any administrative data that does not serve the primary purpose. It is not believed that the annual survey required by the LRA cases could be eliminated by recording union affiliation on the SI cards, as it would still be necessary to examine each card and the file connected therewith to determine which individuals are officers in labor unions, have filed non-communist affidavits, and have not been made subjects of LRA cases. This survey is an administrative device to make sure that cases have been appropriately opened in connection with information secured during the security investigations of individuals.

RECOMMENDATION:

It is recommended that the New York Office be advised that the recommendations of that office regarding ascertaining labor union affiliation and recording such affiliation on SI cards are not approved. There is enclosed a suggested memorandum to New York pointing out the investigation presently required by the Manual of Instructions, that the Bureau does not consider it desirable to add administrative data to the SI cards, and that the annual LRA survey would not be eliminated by recording union affiliation on these cards.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONSSYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 160 and 105. Status of these cases as of February 28, 1958, is set forth herein.

In February, there was an increase in pending active matters in the entire field in the security classifications from 15,447 to 15,503. Delinquent matters increased from 1,453 to 1,470. The percentage of delinquent matters decreased from 9.5% to 9.4%.

Letters are being sent to the offices indicated by asterisks on pages four and five herein, commenting upon their delinquency and pointing out the necessity of bringing their security cases to a current status. Letters are being directed to ten offices as compared to three offices last month.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the March, 1958, administrative reports.

Memorandum for Mr.

SUGGESTION #650-58
SUBMITTED BY SA
CINCINNATI DIVISION

Security Index - 100

SUGGESTION: That the name of the Communist Index be changed to Revised Subversive Index, as the present name is misleading and confusing since the index covers not only the Communist Party but other basic revolutionary groups, such as Socialist Workers Party, etc.

ADVANTAGES STATED: Suggester states it would properly describe the present Communist Index which is not limited to any one basic revolutionary group and which by reason of its present name is misleading. Abbreviated as ~~RSI~~ (Revised Subversive Index), it would not be confused with SI which is the abbreviation of the Security Index and to which it is an adjunct. *Abbreviation suggested for*

OBSERVATIONS: SAC, Cincinnati, recommended favorably.

The Domestic Intelligence Division has studied the suggestion and recommends that it not be adopted. The index referred to has been known as the Communist Index since it was established and has always included the names of individuals affiliated with subversive organizations of all types, the Manual, Section 87-D, being specific with respect to cards that should be filed in this Index. There has been no previous indication that the title "Communist Index" is misleading or confusing. In addition, file backs of all cases on individuals whose names are included in the Communist Index are stamped RCI (Revised Communist Index) to indicate that their names are so included. By the adoption of this suggestion, it would logically follow that these file backs should be changed and stamped RSI.

Training and Inspection Division concurs with the views of the Domestic Intelligence Division.

RECOMMENDATION: That suggestion not be adopted. No further action necessary as Mr. *REC-18* has been thanked by letter: *- 2455*

FRAUD AGAINST THE GOVERNMENT
INVESTIGATIONS

Submitted herewith is a revision of Section 87D 3 b (6) of the Manual of Instructions dealing with fraud against the Government investigations arising out of concealment or falsification relating to subversive information. The proposed revision correlates and summarizes the existing instructions as to the basic investigative procedures to be followed in cases of this type in somewhat greater detail than the present section. It is believed this revision will promote efficiency in handling these investigations, particularly when they are initiated in the field. It is noted that as a result of SAC Letter 57-74 dated 12-30-57 which instructed the field to discuss these cases with other agencies, a greater number of these investigations are being initiated in the field.

RECOMMENDATION:

That the attached revision of Section 87D 3 b (6) be placed in the Manual of Instructions.

FROM :

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONSSYNOPSIS: *Security Index - Gen.*

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of March 31, 1958, is set forth herein.

In March, there was an increase in pending active matters in the entire field in the security classifications from 15,503 to 16,395. This increase, amounting to 892 pending active matters in security classifications, represents the sharpest increase in these cases we have experienced during the past nine months. Delinquent matters increased from 1,470 to 1,924. The percentage of delinquent matters increased from 9.4% to 11.7%. While the number of delinquent matters increased by 454 cases, an analysis of all administrative reports reveals that this increase is generally spread throughout the field with only four offices having delinquency in excess of 15% as compared with ten offices during the preceding month.

Letters are being sent to the offices indicated by asterisks on pages four and five herein, commenting upon their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the April, 1958, administrative reports.

Memorandum for Mr.

Re: DELINQUENCY IN SECURITY INVESTIGATIONS

DETAILS:

The March, 1958, administrative reports from all offices reflect that the total pending active matters in classifications 65, 100 and 105 increased from 15,503 to 16,395. This increase, amounting to 892 pending active matters in security classifications, represents the sharpest increase in these cases we have experienced during the past nine months. Delinquent items increased from 1,470 to 1,924. The percentage of delinquent items increased from 9.4% to 11.7%. While the number of delinquent matters increased by 454 cases, an analysis of administrative reports reveals that this increase is generally spread throughout the field with only four offices having delinquency in excess of 15% as compared with ten offices during the preceding month.

The following statistics reflect the status of pending work, including both pending active and pending inactive matters, and delinquency for all field divisions for the last four months.

SUBJECT: SECURITY INDEX - General

The Security Index files are maintained in Room 1264 in steel cabinets -- three for the Security Index cards and one for related files. Two keys are required to open these cabinets.

To insure maximum security with regard to our Security Index cards, the two keys which open the above cabinets are being kept in your desk under your immediate control and at night and on week ends and holidays under the control of supervisors assigned to duty in your office. These keys have been placed in a 3 x 5 box labelled "Security Index Keys."

Under present procedure, the keys are obtained each morning by a clerical employee prior to 9:00 A.M. on work days. After the cabinets in Room 1264 have been opened, the keys are returned promptly to your office and placed in the 3 x 5 box in your desk.

RECOMMENDATION:

That a copy of this memorandum be placed in the Weekend Duty Folder in your office in order that its contents may be available to the supervisors assigned to your office on nights, week ends and holidays. The latter personnel are reminded of the established policy that under no circumstances are the Security Index cabinets to be opened by clerical personnel during nonwork hours. They may be opened by individual supervisors only upon extreme emergencies and then only with specific approval and instructions of you or me or persons acting in either of our absences. If under such emergency, recourse is had to the Security Index cabinets, under no circumstances may any card be removed.

We forward to the field quarterly an alphabetical list of each office's Security Index in order that the Security Index cards maintained in the field may be checked and reconciled with Bureau records.

There is attached a proposed letter to all offices except Jacksonville containing appropriate instructions regarding the handling of the list. A separate letter is being directed to the Jacksonville Office in this matter setting forth detailed instructions for the handling of the list, such action being necessary as no previous lists have been forwarded to that office.

RECOMMENDATION:

That the attached letter be approved and forwarded.

REC- 50

There is attached for each office an alphabetical list of its Security Index subjects (two copies for New York) prepared from the Bureau's security index as of April 15, 1958.

The attached list should be used to reconcile the Security Index in your office with the Security Index at the Seat of Government by checking the names on the list against the Security Index cards. Detailed instructions regarding the handling of this list are contained in Bureau letter to Albany, copies to all offices, captioned as above, dated January 17, 1956.

SUBJECT: DELINQUENCY IN SECURITY INVESTIGATIONS

SYNOPSIS:

Each month we follow the field closely on the status of security work by analyzing the backlog of pending cases and delinquency in espionage, internal security, security matter and foreign intelligence cases in classifications 65, 100 and 105. Status of these cases as of April 30, 1958, is set forth herein.

In April, there was a decrease in pending active matters in the entire field in the security classifications from 16,395 to 15,735. Delinquent matters decreased from 1,924 to 1,503. The percentage of delinquent matters decreased from 11.7% to 9.6%.

Letters are being sent to the offices indicated by asterisks on page five herein, commenting upon their delinquency and pointing out the necessity of bringing their security cases to a current status.

RECOMMENDATION:

The field will continue to be followed closely regarding security delinquency and you will be advised of the results of the review of the May, 1958, administrative reports.

DETAILS:

The April, 1958, administrative reports from all offices reflect that the total pending active matters in classifications 65, 100 and 105 decreased from 16,395 to 15,735. Delinquent items decreased from 1,924 to 1,503.

(I) SECURITY INVESTIGATIONS OF INDIVIDUALS -- In reviewing General organizational reports in internal security matters, the Bureau has noted a tendency on the part of some field offices to fail to open for immediate investigation some individual cases in which allegations of current membership or activity in subversive organizations exists.

It is a fundamental FBI responsibility to open immediately cases on individuals concerning whom information is received indicating current membership and activity in a basic revolutionary organization or active participation or leadership in front groups. Indications to this effect developed in the course of investigation of subversive organizations as such must be promptly resolved by investigation so that the questions of potential dangerousness and Security Index status can be resolved as soon as possible.

This matter will be followed closely at the Bureau to assure that cases in this category are promptly opened and investigated.
